

## Paint cups

The **Profix cups** present a disposable cup system tailored for primers and paints, strategically designed to maximize painting efficiency. This innovative system significantly reduces cleaning time and minimizes the need for cleaning agents. It allows for mixing, spraying, and storage of paint within a single kit and offers various adaptors compatible with most spraying guns for added versatility.

EASY WORKFLOW

MULTI-PURPOSE APPLICATION

**LIFE SPAN**  
disposable

**APPLICATION**  
300 ml - spot repairs  
500 ml - minor repairs  
750 ml - medium repairs  
1000 ml - major repairs

PROCESS

**STEP 1**  
install the appropriate adapter on the spraying gun

**STEP 2**  
pour the products one by one into the cup

**STEP 3**  
place and cap the sieve

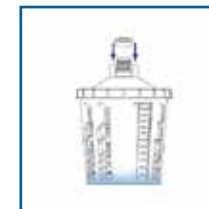

**STEP 4**  
turn the gun 180 degrees and push it onto the sieve opening

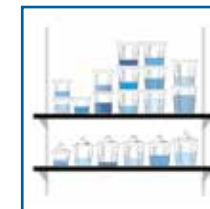

**STEP 5**  
spray

**STEP 6**  
dismantle the cup from the spraying gun

**STEP 7**  
push the stopper onto the opening of the cup to prevent the contents from evaporating

**STEP 8**  
to save space; the cups can be stacked using a flat lid
